## UNDER-EYE CONCEALER

Since the skin around your eyes is thinner, the area surrounding your eyes is the part of your face that will reflect the wrinkles caused by your facial expressions the most. For a younger and more dynamic appearance, the area around the eye needs special care. Self Cream Under-Eye Cream reduces the negative effects of your busy daily life around the eyes, and provides a younger, smoother, hydrated and refreshed appearance. Thus, it offers a more lively appearance that does not reflect the effects of your sleepless, tiring day.
